Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Ms. Rudich contends that the plasma treatment of the organic layer (as claimed) results in OH bond structure, thus improving adhesion between organic layer and the second layer. However, Yamaji discloses the plasma treatment of the inorganic layer, thus resulting in SiH bond structure. The proposed amendment and the bond structure's contention seem to overcome the pending rejection.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)
